Experience

Software Developer

Amazon Ads • Santa Monica, CA

Oct 2022 – March 2024

Developed and maintained full-stack applications built using AWS cloud computing tools (Lambda, SQS, S3), coding languages (Java, Python, JavaScript, typescript, CDK), interactions with large data bases (SQL), networking (API, VPC), and best practice principles (clean code, continuous deployment, unit/integration testing).

- Engineered large systems to aggregate customer shopping data using ELT pipelines, enhancing decision-making for stakeholders and optimizing fund distribution
- Modified UI components with typescript, incorporating feedback from UI Design to improve user experience and functionality
- Modernized critical sections of legacy code, improving performance and maintainability by refactoring and implementing updated design patterns
- Managed and optimized AWS services including Lambda, S3, SQS, and VPC, improving system performance and cost-efficiency.
- Implemented automated fail safes to enhance reliability and error transparency

Amazon Associate • Learning Ambassador

Amazon Fulfillment • Lakeland, FL

Dec 2020 – Feb 2022

Excelled in a fast paced, highly demanding position; displaying leadership principles and work ethic. Admitted to Amazon Technical Academy, Amazon's software development upskill program.
